

Global Directory of Smoke-Free Multi-Housing Programs

January 2017

The purpose of this directory is to assist those working on smoke-free multi-housing in connecting better with each other and each other's services. The programs listed in this directory have granted permission for their program contact information to be shared publicly on websites and other materials. Should you also wish to share other information listed in this directory, please contact the individual program for permission. The organizations are listed by region, in the order in which they were received.

Compiled by Live Smoke Free
A program of the Association for Nonsmokers-MN

Janelle Growden	Communications Coordinator/ Project Officer	(08) 6365 5436	jgrowden@acosh.org

Program Details

Program Description/Services: The Australian Council on Smoking and Health (ACOSH) works to protect the population from the harmful effects of second-hand smoke exposure by reducing smoke drift among multi-unit housing (strata-titled properties) and public housing. This is achieved through the implementation of community incentives, legal assistance and training to strata managers and residents.

Smoke-free Strata Housing Incentive Scheme: The ACOSH smoke-free strata housing incentives assist multi-unit apartments to implement a smoke-free by-law at the property. ACOSH has partnered with law firms and strata consultants and negotiated a reduced price for legal assistance. The law firms assist to draft schedule two by-laws that ban smoking on common property, provides that smoking within a lot must cause no nuisance or interfere with peaceful enjoyment. The ACOSH grants provide legal support to members of the community exposed to second-hand smoke at their multi-unit apartments. Please see the application form and guidelines for the grants attached. Please note this is exclusive to Western Australia.

Smoke-free Seminars: Strata Community Australia (SCA) (WA), ACOSH and Cancer Council of Western Australia organize smoke-free living seminars to strata managers and residents living in multi-unit apartments. The seminars aim to increase level of knowledge and affirmative attitudes to dealing with smoke drift disputes in multi-unit housing and provide information and legal assistance on how to implement a smoke-free by-law.

Advocating for a change in the 1985 Strata Titles Act: ACOSH, alongside other partners in Western Australia are advocating to change the Strata Titled Act 1985 to specify that tobacco smoke is a

nuisance which unreasonably interferes with the use and enjoyment of the property by others and introduce a model by-law that would prohibit smoking where it causes a nuisance or hazard or otherwise interferes unreasonably with the use or enjoyment of the property by another resident. These amendments will provide strong authority to enact smoke free areas and comprehensive smoke free properties and provides all owners and residents with clear direction on this issue.

Geographic Area Served: Western Australia

Types of housing your program works with (public housing, market rate, condos, co-ops, etc.):
Strata title multi-unit housing.

British Columbia, Canada

Program Details

Program Description/Services: We provide information to housing industry professionals about the legality of smokefree housing policies and the health issues connected with the problem of drifting tobacco smoke in multi-unit housing. We also provide information and advocacy assistance to residents of apartments and condos who are suffering because of a neighbor's tobacco smoke. We also work with city councils and residents of cities in Los Angeles County that are concerned about the problem of drifting tobacco smoke in multi-unit housing. As part of that work, we do community organizing in various cities, and provide technical assistance to city staffs that are developing housing ordinances.

Geographic Area Served: Primarily Los Angeles County (6 million population) but also CA

Types of housing your program works with (public housing, market rate, condos, co-ops, etc.): We work with providers and residents of affordable and market rate housing. We also work with condominiums. We have not encountered any co-ops in CA. We have participated in the passage of 6 out of 9 smokefree housing ordinances passed in Los Angeles County.

Bob Curry	Program Manager	415-473-2559	rcurry@marincounty.org

Program Details

Program Description/Services: Over the past five years the Marin Tobacco Related Disease Control Program (TRDCP), at the request of Coalition members, policy leaders and community members, have been working closely with city and county staff and local officials to develop and adopt strong Multi-Unit Housing (MUH) policies in order to protect the public health. The model policy has served as a basis for policies adopted in 9 of our 11 jurisdictions that will now serve as a model and benchmark for other jurisdictions in Marin. Of the 9 communities with Smoke-Free MUH polices 4 ban smoking in all units that share a wall or ceiling. TRDCP is the 1st responder to all violation complaints and are highly successful in compliance. Information is available through the Coalition website (www.smokefreemarin.com) to assist property owners and managers of apartments and condos with model leases, addendums, notices and sample letters. In addition to the compliance and enforcement assistance the program provides cessation for all residents of MUH.

Erica Berg	Health Program Specialist	(303)602-3644	Erica.Berg@dhha.org
Teddy Montoya	Health Program Specialist	(303)602-3684	Teddy.Montoya@dhha.org

About Your Smoke-Free Housing Program:

Program Description/Services: The DPH Chronic Disease Tobacco Team provides technical assistance (T.A.) for the state of Colorado in the area of smoke-free multiunit housing. We provide education, formal trainings, resources, and hands-on and one-on-one assistance to housing providers who wish to implement smoke-free policies. T.A. is also offered to local health agencies that are supporting housing providers in making properties smoke-free.

In addition to statewide technical assistance, Denver Public Health has a community smoke-free housing program that provides tobacco education and prevention services, as well as links to cessation resources throughout the City and County of Denver. DPH provides one-on-one on technical assistance to housing providers working to implement smoke-free policies at multiunit housing properties. DPH can also provide mentoring for other LHAs taking part in smoke-free housing activities.

Geographic Area Served: As technical assistance providers for smoke-free multiunit housing, we serve housing providers, attorneys practicing housing law, and local health agencies across the state of Colorado. At the local level we work with local housing providers in the city and county of Denver who wish to implement or strengthen smoke-free policies in multiunit housing.

Types of housing your program works with (public housing, market rate, condos, co-ops, etc.): We work with all types of housing, with special emphasis on properties that serve at-risk and disparate populations and those disproportionately affected by tobacco use and SHS exposure, such as multiunit housing, including public, subsidized and affordable housing.

Program Details

Program Description/Services: The SmokeFreeApartment Initiative is a partnership of the Smoke-Free Environments Law Project, numerous local health departments and other agencies, and the Tobacco Section of the Michigan Department of Community Health. The goal of the initiative is to make smoke-free multi-unit housing the norm in Michigan, as well as to serve as a catalyst and support for other similar initiatives throughout the U.S., Canada and the globe. The program provides information and technical assistance to multi-unit property owners/managers to assist them in adopting and implementing smoke-free policies, as well as assistance to tenants/condo owners. The program utilizes: legal and related research; an award-winning web site and related web site; extensive informational materials; press releases and media initiatives; radio ads; postcard mailings to landlords; billboards; landlord and tenant surveys; presentations at meetings/conferences; webinars; memberships in property management/apartment associations; coordination with public housing associations; coordination with HUD; etc.

Geographic Area Served: Michigan primarily, but also U.S. and international

Types of housing covered (public housing, market rate, condos, co-ops, etc.): Public housing, other affordable housing, market rate housing, condominiums, co-ops, student residential housing, etc.

Program Details

Program Description/Services: The Live Smoke Free program promotes smoke-free policies for apartment buildings. In order to increase the number of smoke-free buildings, Live Smoke Free educates building owners, managers, local policy makers, renters, and housing industry professionals about the benefits of smoke-free buildings. Live Smoke Free assists building owners and managers with creating and promoting a smoke-free policy for their property. The program also assists renters in finding solutions to secondhand smoke problems. Tenants can learn how to talk to their manager about creating a smoke-free policy for the building.

Geographic Area Served: Serves the housing industry and residents statewide in Minnesota. Live Smoke Free also serves as the technical assistance provider for several Minnesota grantees.

Types of housing covered (public housing, market rate, condos, co-ops, etc.): Market Rate, Public Housing, Subsidized Housing, Common Interest Communities (Condos, Townhomes, Co-ops), Specialized Housing (senior, disabled, etc.)

Minnesota, cont.

Program Details

Program Description/Services: The MDH Tobacco Prevention and Control Unit (TPC) awards \$3.2 million in state grant funds to organizations, tribal governments and urban American Indian organizations through the Tobacco-Free Communities and American Indian grant programs. One of the grant focus areas is smoke-free multi-unit housing or housing. There are 6 Tobacco-Free Communities grantees working on smoke-free housing. The MDH Office of Statewide Health Improvement Initiatives (OSHHI) provides state grant funds to 52 Community Health Boards and 9 Tribal Governments and two urban American Indian organizations under the Statewide Health Improvement Program (SHIP). All SHIP grantees are required to work on smoke-free housing efforts on the local level. MDH provides funding to the Association of Non-Smokers-Minnesota's Live Smoke Free Program, the American Lung Association of Minnesota and the Public Health Law Center to provide technical assistance to MDH grantees working on smoke-free multi-unit housing and smoke-free housing.

MDH is working on an evaluation of local smoke-free housing work. For this evaluation, MDH and local public health have recruited rental properties that are in the process of passing smoke-free housing policies. Residents of these properties will be surveyed one month prior to, and six months after, implementation of the smoke-free housing policy in their building. Data from these surveys will allow us to examine changes in cigarette use, exposure to secondhand smoke, and quit attempts from pre- to post-policy implementation.

Geographic Area Served: Minnesota

Types of housing your program works with (public housing, market rate, condos, co-ops, etc.): MDH funded grantees may work on all types of housing including public housing, market rate, condos and co-ops.

Laima Etchegoyhen	Health Educator	(775) 328-6140	letchegoyhen@washoecounty.us

Program Details:

Program Description/Services: The Washoe County Health District collaborates with various organizations such as the Reno Housing Authority, the Nevada State Apartment Association and the Silver State Fair Housing Council to reach multi-unit housing providers. We also work with local law enforcement and fire departments within the Reno/Sparks area to educate the community about the benefits of adopting an indoor smoke-free policy. A renter survey was implemented to assess the attitudes and behaviors of renters towards secondhand smoke. Results of the survey will be disseminated to partners and stakeholders. Survey findings will be used to demonstrate an interest in smoke-free living within Washoe County. In addition, a smoke-free housing directory for Washoe County was developed and will be available on www.gethealthywashoe.com.

Geographic Area Served: Washoe County

Types of housing your program works with (public housing, market rate, condos, co-ops, etc.):

Multi-housing unit properties

Program Details

Program Description/Services: The mission of the American Lung Association is to save lives by improving lung health and preventing lung disease. The American Lung Association in New Mexico offers practical help to people living with asthma, emphysema and other lung diseases. We also confront lung disease at the root level, educating kids about the dangers of smoking, pushing for more smoke-free workplaces and housing, even working to reduce air pollution throughout the state. The Smoke Free @ home Program is designed to support property owners, managers, and residents' transition into a smoke-free environment. Through our Freedom from Smoking program, we provide smoking cessation sessions for residents who are thinking about quitting.

Program Details

Program Description/Services: The Public Health and Tobacco Policy Center is a legal research Center within the Public Health Advocacy Institute. Our shared goal is to support and enhance a commitment to public health in individuals and institutes who shape public policy through law. We are committed to research in public health law, public health policy development; to legal technical assistance; and to collaborative work at the intersection of law and public health. Our current areas of work include tobacco control and childhood obesity and chronic disease prevention. We are housed in Northeastern University School of Law. The Center works with the New York State Bureau of Tobacco Control and its contractors to develop and support evidence-based policy initiatives, including smoke-free housing that will reduce tobacco-related morbidity and mortality in New York.

Program Details

Program Description/Services: The NYC Coalition for a Smoke-Free City works with landlords, property owners, realtors, and tenants to establish voluntary smoke-free housing policies in multi-unit dwellings. Our primary goals are to increase awareness of the deadly and costly impact of secondhand smoke; protect families from secondhand smoke where they live; and inform property owners and landlords about their right to adopt voluntary smoke-free policies. We provide educational materials, and offer presentations within the housing industry, presentations to owners, shareholders and residents, and one-on-one technical assistance to owners and managers who are interested in implementing a smoke-free rule.

Geographic Area Served: NYC's five boroughs – Bronx, Brooklyn, Manhattan, Queens and Staten Island.

Types of housing covered (public housing, market rate, condos, co-ops, etc.): Affordable (public & private) and market rate rentals; and condominium and coop owners, as well as tenant groups and management companies.

Program Details

Program Description/Services: The Department of Health Behavior at Roswell Park Cancer Institute is a research-based program that has assessed secondhand smoke exposures and the implementation of smoke-free policies in the multi-unit housing (MUH) environment. We have conducted population-based surveys of MUH residents and building owners and managers regarding their knowledge, attitudes, behaviors, and support toward smoke-free policies in their buildings. Additionally, we conduct research on environmental exposures of tobacco smoke pollution in the MUH environment, including real-time particulate monitoring, nicotine contamination, and other pollution markers. Although we conduct independent research on these topics, we also support other programs in their research and evaluation activities.

Geographic Area Served: (Western) New York State, National, International

Types of housing your program works with (public housing, market rate, condos, co-ops, etc.):

Program Details

Program Description/Services: The Advancing Tobacco Free Communities grant in St. Lawrence, Lewis and Jefferson counties aims to reduce the impact of tobacco by reducing the impact of retail tobacco marketing on youth, establishing a smoke-free community norm through tobacco-free outdoor air policies and tobacco-free housing policies and reduce tobacco imagery in youth-related movies and tobacco industry presence on social media. By increasing the availability of smoke-free multi-unit housing we will be able to protect the health of NYS residents. We aim to assist public housing authorities, nonprofit community development corporations, apartment management companies and landlords to adopt no-smoking policies in their communities. Through our grant, we provide resources and assistance to incorporate a tobacco-free policy into leases and agreements. We have several resources available for both the tenant and the landlord.

Geographic Area Served: St. Lawrence, Lewis and Jefferson counties in New York.

Types of housing your program works with (public housing, market rate, condos, co-ops, etc.): Public housing, condos, cooperatives.

Program Description/Services: In conjunction with the Franklin County Tobacco Free Collaborative, Columbus

Public Health facilitates the following:

- Consultations and presentations
- Sample survey for residents
- Sample survey for landlords
- Model smoke-free lease addendum to incorporate into your current lease
- Resources to help residents quit smoking
- Advertising that includes a listing on the Columbus Smoke Free Apartments online directory (coming soon!)
- Sample announcement letters to send to renters
- Guidelines for resident meetings and celebrations
- Strategies for advertising your smoke-free building

The Smoke Free Housing Project has created toolkits for Property Owners/Managers and residents, <http://publichealth.columbus.gov/smoke-free-housing-toolkits.aspx>

which are available to the general public and also distributed to partners in the multi-unit housing industry.

The toolkits for Managers/Owners and residents include the following resources:

- Benefits of a smoke-free policy

- Myths and facts about Smoke-Free Housing
- Secondhand smoke and your health
- Steps to creating Smoke-Free apartments
- Facts about Smoke Free Housing in Franklin County
- Ohio Tobacco Quitline brochure
- Quit Smoking Today brochure
- Article: HUD Encourages PHAs to Become Smoke Free
- Article: Optional Smoke-Free Housing Policy Implementation
- Article: Clearing the Air: Industry Discusses Trend Toward Smoke-Free Housing
- Article: Breath of Fresh Air

Geographic Area Served: Franklin County, the city of Columbus, and specifically the Franklinton, Hilltop and Linden neighborhoods.

Types of housing your program works with (public housing, market rate, condos, co-ops, etc.): Public housing, senior housing, market rate apartments and condominiums.

Program Details

Program Description/Services: The Ohio Smoke Free Multi Unit Housing (OSFMUH) workgroup's mission is to eliminate secondhand smoke from multi-unit housing in Ohio by developing a statewide network to support citizens living in multi-unit homes. Our motivation behind this development is to identify how exposure to secondhand smoke is currently being addressed across the state of Ohio and determine the best possible approaches to assist citizens and communities in prevention and control efforts. The workgroup convenes 4 times annually on a quarterly basis. The OSFMUH plans to improve statewide partnerships amongst public health advocates, property managers/owners, residents, and concerned citizens through education, training, technical assistance and policy change in order to protect Ohio residents from involuntary exposure to secondhand smoke.

Through the *Evaluation & Assessment* initiative, the workgroup will survey property owners/managers and residents to gain a baseline for environmental and policy change toward SFMUH in Ohio. This survey will assess the scope of renters' exposure to secondhand smoke, the market demand for smoke-free living, property owner's/manager's opinions about no-smoking policies and evaluate the effectiveness of voluntary policies currently implemented in Ohio.

Through the *Communication & Media* initiative, the workgroup will develop a monthly/annual schedule for the dissemination of communication and promotional material, with avenues used to reach targeted audiences, to publicize technical assistance and communicate current and relevant information in an effort to connect the community at large to our statewide effort while encouraging involvement through items such as a newsletters, blogs, websites, or email bulletins.

Through the *Awareness & Education* initiative, the workgroup will plan an event to recognize a Smoke Free Multi-Unit Housing to educate and bring awareness to the effects and harms of secondhand smoke to families living in multi-unit housing and encourage them to take a pledge to live smoke free in Ohio.

Through the *Prevention & Technical Assistance* initiative, the workgroup will design a response-outreach system when any of three specifically identified incidences occur and provide technical assistance in implementing smoke-free policies in multi-unit housing to targeted populations:

- (1) When new multi-unit housing construction/developments arise in each region of the state, an assigned liaison is alerted to provide a “courtesy-contact” to offer support and assistance with developing a smoke-free multi-unit housing policy prior to the properties development;
- (2) When multi-unit housing property fires occur, the assigned liaison for that area will be alerted to provide a “courtesy-contact” to property managers/owners to offer support and assistance with implementing a smoke-free multi-unit housing policy on their property; and
- (3) When secondhand smoke nuisances occur in multi-unit housing units, the assigned liaison is alerted to provide a “courtesy-contact” to offer assistance with implementing a smoke free multi-unit housing policy in the home and on the property.

Through the *Best Practices & Policy* initiative, the workgroup will develop and outline a specific criterion that ensures a 100% comprehensive smoke-free multi-unit housing policy to set a standard for recognizing properties who reach a top score from the model rubric. Those properties will receive wrap-around technical assistance, a certificate/plaque recognizing the property as 100% smoke-free, and free promotional items/signs from ODH to promote a smoke-free living environment to the public.

Geographic Area Served: Statewide

Types of housing your program works with (public housing, market rate, condos, co-ops, etc.):

In order to expand our reach to underserved and disparate populations, we focus intensely on increasing the number of smoke-free multi-unit public housing. We also provide technical assistance to property owners and their managers in all other forms of multi-unit housing.

Program Details

Program Description/Services: The Creating Healthy Communities Project (CHCP) of Allen County Public Health promotes smoke-free policies among Allen County housing facilities – federal, state, and local public and private housing. The Allen County Smoke-Free Housing Project is geared towards tenants and landlords who want to make their housing units smoke free whether it is a single dwelling, duplex, six-building condominium complex, or multiple apartment complex. The CHC Project is dedicated to improving the health of its residents through nutrition, physical activity, and reduced tobacco use.

This project will help achieve the CHC Project’s goals of reducing tobacco use and supporting tobacco-free living. The Smoke Free Housing Project assists residents in approaching the property manager/owner about smoke-free housing and provides technical assistance as needed. The project also works with property managers/owners to adopt or modify smoke-free housing policies in their housing complexes, assists with resident notification, and provides other technical assistance as needed. Once a property is smoke-free, they are listed on Allen County Public Health’s website and promoted through social media as well as other media outlets. Educational resources and signage are provided as long as supplies last.

The Allen County Smoke-Free Housing Project has developed toolkits for Landlords, Property Owners/Managers and Residents (http://www.allencountypublichealth.org/?page_id=872) which are available to the general public and also distributed to partners in the multi-unit housing industry. The toolkits for Landlords, Property Managers/Owners provide resources on secondhand smoke, cessation, legal rights of landlords, maintenance costs, how to adopt and implement a smoke-free policy, and enforcement tips of a smoke-free policy. Sample documents are available for landlords and property managers to use. The toolkits for residents provide resources on secondhand smoke, cessation, legal rights of tenants, how to work with neighbors and landlords to go smoke free and options for legal action. Sample documents are available for residents' use.

Geographic Area Served: Allen County in Ohio

Types of housing your program works with (public housing, market rate, condos, co-ops, etc.): Specifically public housing, but in general, we work with property owners/managers and residents in all forms of housing in the county.

Program Details

Program Description/Services: Oklahoma Smokefree Multiunit Housing toolkit materials including Landlord Manual, Advocacy Manual, 4 varieties of decals, fact sheets, brochures and related items (accessible at BreatheEasyOK.com). Trainings, special presentations, and consultation with local coalitions and tribes are offered. The Center for the Advancement of Wellness provides technical assistance directly to MUH owners and managers in areas not served by local coalitions. The toolkit was introduced in 2014 along with intensified efforts to reach out to landlords, focusing in 12 counties. Most community activity is via tobacco control and wellness coalitions receiving funding from Oklahoma's Tobacco Settlement Endowment Trust (TSET). Coalition consultations also include smokefree MUH support by TSET and Turning Point (a community field program of the Oklahoma State Department of Health) program consultants.

Geographic Area Served: Statewide in Oklahoma.

Program Details

Program Description/Services:

We provide technical assistance for property managers and property owners interested in smoke free housing. The Live Tobacco Free Austin program is a voluntary effort to lessen the societal burden of tobacco on our community, and provides information on cessation resources, health effects, and facts for tobacco-free workplaces and living places. Our technical assistance begins with property consultations and surveys, timeline scheduling, drafting appropriate policies and culminates with marketing ideas. Multi-unit housing owners/managers who go smoke free or tobacco-free are able to utilize our apartment locator webpage to advertise their property.

Geographic Area Served: City of Austin, Travis County, greater Austin (technical assistance).

Program Description/Services: Our Smoke-Free Housing campaign begins with one unified initiative: prevention of lung disease and general promotion of respiratory health. The Vermont Dept. of Health strives to achieve this goal by addressing the often understated effects of secondhand smoke exposure in multi-unit housing, providing Vermonters with research, resources and progressive law enforcement on the matter at hand. The Smoke-free housing program aims to devise a series of strategies and courses of action to further both knowledge of smoke-free housing policies, through research, and a systematic progression towards smoke-free multi-unit housing in Vermont through fundamental policy change. The Tobacco Control Program at the VDH has a hard working team dedicated foremost to smoking cessation that targets a wide demographic in the state of Vermont. Our program provides free Nicotine Replacement Therapy and a qualified team of quit coaches available online, over the phone, and in person. For more information about our cessation services, visit www.802Quits.org, where you will find resources available for Vermonters looking for inspiration, support and a myriad of useful tools to embark on a new smoke-free way of life and helpful ways to sustain it.

Program Details

Program Description/Services:

The American Lung Association in the District of Columbia with funding from the District of Columbia Department of Health has funds to give technical assistance and cessation services to properties in the District of Columbia that want to implement smokefree policies.

We provide:

- 1) Technical assistance drafting and implementing a smokefree policy to include both units and common areas.
- 2) Support and provide materials for education efforts for residents on the effects of 2nd hand and 3rd hand smoke as well as smoking cessation.
- 3) Cessation programs for those who want to quit smoking as well as nicotine replacement therapies to assist in the quit.
- 4) Training to staff and volunteers to run Freedom from Smoking Clinics, our smoking cessation in-person program, on the properties.

The Lung Association is ready to provide the education, materials, and technical assistance needed to move your building smokefree.

Geographic Area Served: The District of Columbia

Types of housing your program works with (public housing, market rate, condos, co-ops, etc.): mixed income housing and public housing
